Good morning,

I am continuing to write to you as one of the representatives that are elected to represent my interests as a citizen of San Antonio, Bexar County, Texas, USA.

I am specifically experiencing an ongoing private nuisance that is being created from inside of the United States government that is created as follows:

1. There is an illegal spying operation monitoring my computer, phone, and ipad activity to follow every piece of work that I am producing, every news article that I am reading, and every record that I am making - every day, every hour, at all times, without end;

2. A team of drivers are being fed information from this spying feed that is then alerting or signaling them to drive a vehicle past my house to regularly coincide with my work in a manner that 'sends me a message' of threat, harassment, and intimidation;

3. Loud music, loud engines, bass noises, and other intrusive 'sound effects' are being produced by neighbors (former federal government employees and other military related veterans, etc) to create a non-stop nuisance of noise, agitation, and harassment to us while we attempt to have a normal life within the confines of our home.

I have been reporting this activity to you and others for a very long time now and I am of the understanding the literally nothing can be done to stop this because it is being produced by criminals that are operating without any oversight at all from within the national security apparatus of the United States of America.

I am alerting your office that this is the direct result of my efforts to become involved in the political functioning of our community and that this is the work of Donald Trump and his team of criminals.

I hope that this message finds you well. Unfortunately, us in the community cannot be said to be experiencing the same wellness, because we are being constantly harassed by a large criminal operation that is emanating from inside of our country's 'security' system.

I trust that you will take this message, and the many others that I have written to your office, as serious indications of the depth of decay that has rotted away the core values of our nation's law enforcement community.

We are literally being harassed by a bunch of dirty military personnel as they attempt to drive me, personally, into the custody of their local police counterparts.

Our military and police are working to agitate my life to the point that they turn me into a thought criminal for hating my own country.

This is the true story of one man that attempted to help his neighborhood defend itself from evil.

Unfortunately, this country is so deeply captured by evil villains that there is nobody at all that has responded to my messages in any positive way.

America let us down. America left its own values behind and America is now attacking its own people as aggressors in a war for our survival.

You, as a political representative, have a duty to represent our interest in this community and I am informing you of very serious offenses being committed against my home.

Please take your responsibility seriously and advance this information to the appropriate people within government that can hold the military accountable for their criminal campaign of psychological warfare that they are waging against their own people.

Thank you for your attention to this important matter.

Kindest regards,

Chris Noel Carlin
